PROFESSIONAL SUMMARY

Senior Technical Business Analyst with 12+ years delivering data platforms, API ecosystems, and analytics solutions in enterprise environments. Deep expertise in SQL, Power BI, Snowflake, and AWS with a strong record of translating complex business needs into actionable data insights for Amazon.

TECHNICAL SKILLS

Cloud & Data Platforms: AWS, Snowflake, Confluent Cloud	Database & Operating Systems: IBM DB2, RDBMS, SQL Server, DynamoDB, MySQL, Mainframe, Datacom, Windows
API & Integration: RESTful APIs, JSON, Swagger, ReadyAPI, Swagger Editor	Modeling & Designing: MS Visio, SmartDraw, Process Model, LucidChart
Data & Analytics: SQL, Power BI, Tableau, Informatica, SAS Enterprise Guide, MS Excel, Data.World	Other Tools: IBM Audit Viewer, JIRA, Confluence, GitLab, Maestro
Methodologies: Agile, Scrum, SAFe, UAT, BRD/FRD	

WORK EXPERIENCE

Sr. Technical Business Analyst BETANXT (formerly LSEG) — Brookfield, WI	<i>Oct 2021 – Present</i>
- Driving the build-out of DataXchange on Snowflake by curating and onboarding 145+ enterprise datasets; partnering with AI teams to enhance dataset intelligence through enriched metadata, structure, and business context. - Leading the design of AI-assisted data governance workflows to automate metadata generation and standardization across 14 domains, reducing manual effort by ~70% and improving cross-domain data consistency. - Design and maintain scalable Snowflake views to enable governed data access, ensuring alignment with business use cases, data quality standards, and regulatory requirements. - Translate business requirements into service specifications - including JSON schemas, data mappings, and end-to-end API flows. - Perform root cause analysis and data validation using SQL, IBM Audit Viewer, and mainframe tools, resolving 100+ production incidents and reducing defect re-open rate. - Own Agile backlog decomposition and sprint planning across 3 teams (35 members total), transforming epics into well-defined user stories with acceptance criteria, Definition of Ready, and Definition of Done. - Support QA across multiple releases with test planning, data preparation, and smoke/UAT testing via ReadyAPI and Swagger Editor, achieving 92% first-pass acceptance rate. - Led feasibility analysis and migration from DynamoDB to Snowflake to implement 7-year WORM-compliant data retention, reducing storage costs by ~24% and satisfying regulatory compliance requirements. - Integrated 400+ APIs into the AWS-hosted Operations Workbench, guiding web teams on efficient UX designs that reduced load. - Identified and resolved an order-lifecycle gap by defining event triggers for expiring VSP orders using multi-table SQL analysis. - Developed a Power BI dashboard using a centralized Excel data source to standardize API inventory tracking, significantly reducing manual effort of scrolling through Excel, and improving reporting efficiency and data visualization. - Created an Excel-based calculation model to assist API developers and QA teams with validating complex API transactions, reducing QA effort by 20% and defect rate by 60%.	
Sr. Technical Business Analyst ADROIT — Brookfield, WI <i>Client: Refinitiv</i>	<i>May 2018 – Oct 2021</i>
- Client: Refinitiv - Designed 300+ RESTful APIs for Refinitiv's financial data platform, translating business requirements into robust, integration-ready service specifications consumed by enterprise clients globally. - Provided training and support to clients on using data products effectively. - Performed impact, feasibility, and gap analyses to define project scope and success criteria across multiple concurrent workstreams. - Conducted source-to-target data mapping and maintained data dictionaries, transformation logic, and applicable business rules.	
Business Systems Analyst Aon Hewitt	<i>Nov 2011 – Jul 2016</i>
- Analyzed requirements in the Defined Benefit domain and implemented system changes via COBOL snippets. - Produced SQL and JCL-based impact analysis reports to validate downstream data accuracy after of each release.	

- Executed end-to-end testing to validate accuracy, functionality, and regulatory compliance of system enhancements.

EDUCATION

MS in Computer Information Systems — Colorado State University, USA

Dec 2017

Graduate Web Developer (Part-Time), Aug 2016 – Dec 2017

Bachelor of Technology in Information Technology — Lovely Professional University, India

May 2011
